quotation from Jean Paul Frederick Richter: God called up a man into the vestibule of Heaven, saying: "Come thou hither and see the glory of My house." And to the servants that stood around His throne He said: "Take him and undress him from the robes of flesh, cleanse his vision and put new breath into his nostrils; only touch not with any change his human heart—the heart that weeps and trembles." It was done, and with a mighty angel for his guide, the man stood ready for his infinite voyage; and from the terraces of Heaven, without sound or farewell, at once they wheeled into endless space. Sometimes, with solemn flight of angel wing, they fled through sahara of darkness, through wildernesses of death that divide the worlds of life;

sometimes they swept along frontiers that were quickening under prophetic motion. Then from a distance that is counted only in Heaven, light dawned for a time through a sleepy film; by nnutterable pace the light swept to them, they, by unutterable pace, to the light. In a moment the rushing of planets was upon them; in a moment the blasting of suns was around them. Then came eternities of twilight that revealed, but were not revealed. On the right hand and left towered mighty constellations, that by counter positions built up triumphal gates, whose architraves—horizontal, upright—rested, rose, at altitude, by spans that seemed ghastly from infinitude. Without measure were the architraves, past number were the archways, beyond past number were the archways, beyond memory the gates. Within were stairs that scaled the eternities below; above was below—below was above to the man stripped of gravitating body—depth was swallowed up in height unsurmountable, height was swallowed up in depth unfathomable. Suddenly, as they thus rode from infinite to infinite—suddenly, as they thus tilted over abysmal worlds—a mighty cry arose, that systems more mysmighty cry arose, that systems more mys-terious, that constellations more glorious that worlds more billowy, other heights and other depths, were coming, were nearly, were at hand! Then the man sighed and stopped shuddered and wept. His overburdened

heart uttered itself in tears, and he said : "Angel, I will go no further. For the spirit of man acheth with its infinity. Insufferable is the glory of the universe. Let me lie down in the grave and hide myself from the persecution of the infinite; for the end there is none." And from all the listening stars that shone around, issued a choral voice: "The man speaks truly; end there is none, that even yet we have heard of. And there is none!" The angel solemuly demanded:
"Is there indeed no end, and is this the
sorrow that kills you?" But no voice answered, that he may answer himself. Then the angel throws up his glorious hands toward the Heaven of Heavens, saying: "End there is none in the universe of God. Lo! also, there was no beginning."

- A volume of smoke arises constant from the midst of a dense morass in Valkulla county, Florida, and has for at least fifty years been a mystery to the people of that region. The spot is five miles from the nearest point to which any person has ever penetrated. The negroes believe that it is the entrance to hell, and regard it with awe. Some of the whites accept the theory of a volcano. Judge White, of Tallahassee, lately organized an expedition to explore the awamp but failed to make way in the

tangled rank growth. - A woman at Cape Girardeau, Missouri, who had suffered from a husband's neglect, traced him to a bar-room, where he was playing cards with several com-panions. Setting a covered dish she had in her hands down upon the table, she said: "Presuming, husband, that you were too busy to come home to dinner, I have brought you yours," and departed. With a forced laugh he invited his friends to dine with him, but on removing the cover from the dish found only a slip of paper, on which was written: hope you will enjoy your meal; it is the same your family have at home."

- A watch-maker in Newcastle. Penn., says a Pittsburg paper, has com-pleted a set of three gold shirt studs, in one of which is a watch that keeps excel lent time, the dial being about three-eights of an inch in diameter. The three studs are connected by a strap of silver inside the shirt bosom, and the watch contained in the middle one is wound up by turning the stud above, and the hands are set by turning the one below. But perhaps the most remarkable thing about the lilliputian machine is that'it works with a pendulum like a clock, and the pendulum will act with ease and accuracy in whatever position the time-piece is placed, even if it be turned upside down.

### Bitten by a Spider.

Mr. Jno. White, of Pickens, living between Greenville and Easley Station, was bitten on Friday last, while plowing in his field, by a large black "bottle" spider. The spider had gotten inside the quarter of his right shoe, and bit him with vengeance near the ankle. Reaching down he caught the insect with his fingers and mashing it, threw it down. In less than one hour afterwards Mr. White felt the effects of the poison in his back and hips and stomach. He went home and suffered the most awful agony all night, the poison of the spider affecting his whole body from his head down, until he was prostrated. It traveled down his legs, burning like fire, and seems to have settled in his left foot, which is greatly swollen and looks as if pain, apprehends no serious results here-after.—Greenville News, 4th inst.

# **HEADQUARTERS**

# MACHINERY,

For the counties of Abbeville, Anderson, Oconce. Pickens, Greenville and Laurens.

Steam Engines, Steam Power Presses,

Cotton Gins,

⚠ HE above cut represents the HALL SELF-FEEDING COTTON GIN, manfactured at Sing Sing, New York, which has been sold in all of the above-named Counties, and which has given entire satisfaction wherever used. The saws are made of the best imported steel. The saw shaft is the largest made. An examination of other Gins will convince you it is the most substantially built Gin in use. It never breaks the roll, and therefore does away with the expense of the revolving head, as the secret of making the Gin to prevent its breaking the roll is in the proper shape of the roll-box. It is the only Gin that runs successfully with the Feeder and Condenser attached, and the only Gin that will feed yellow cotton. Below I give you a few testimonials and names: Lewis C. Clinkscales, Abbeville; A. J. Stringer, J. W. Poore, Belton, W. M. Shirley, S. R. Timms, John D. Kelly, Basil Callaham, and many others:

BREWERTON P. O., Laurens Co., August 6, 1880.

Mr. John E. Peoples, Anderson, S. C.—Sir: The 60-Saw Hall Cotton Gin, Feeder and Condenser we bought of you last Fall is a perfect success in every respect. We run it by steam, and gin 10 bales of 450 lbs. per day with ease. It is the best conwhich is greatly swollen and looks as it structed and finest finished Gin I ever saw. It gins faster, makes a better sample, an immense boil was forming. He was in the city yesterday being treated by Dr. Glezener, and while still suffering some for the public last Fall 600 bales, and give the best satisfaction of all the ginners. The seed being so perfectly clean, it makes a better sample. Further, it separates from the seed cotton, before going into the roll-box, rocks, grit, nails and matches. There is less danger from fire, owing to the Self-Feeder taking out all hard substances before they come in contact with the saws. The cotton picked by the Gin the last season was carefully weighed before it was picked and after being baled, and the average yield the season through was 1 lb. of lint for every 22 lbs. of seed cotton. I have used since the war Gins of four different makes. Yours makes a better liut, cleans the seed better, gins much faster, and for its simplicity unsurpassed. I think it is destined, in a great measure, to supersede all others. I heartly recommend it to those who wish to purchase Gins. It will more than repay the additional

KNIGHT & BALENTINE.

BELTON, S. C., May 4, 1881. Mr. John E. Peoples, Anderson, S. C.—DEAR SIR: Your favor of the 30th of April received, and in reply I have to say that after a very late start I ginned 150 bales of cotton on the Hall Self-Feeding Cotton Gin. Everything has worked well, and the whole outfit has given entire satisfaction, both to my customers and myself. I would not think of running a Gin without the Feeder and Condenser. The Feeder does better work than possibly can be done by hand. Both the Feeder and Condenser are indispensable. Yours truly JOSEPH D. PINSON.

Very respectfully,

ANDERSON, S. C., May 7, 1881.—John E. Peoples, Agent Hall's Gin—Sin: The 40-Eaw Hall Gin, made at Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction. It cleans the seed well, and makes a superior lint, and runs light. L. H. WELBORN. The saw shaft and saws are the best I ever saw. To J. E. PEOPLES-The 50-Saw Hall Gin, Feeder and Condenser I bought from

you last Fall beats any Gin I have ever seen, and I have used and tried four different kinds. It runs light, makes a good sample, gins fast, and will surpass any Gin in making a good turnout and in cleaning the seed. Now, if you desire a good Gin, try the Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y. The Feeder and Condenser can't be beat, as the Feeder will feed any kind of cotton—yellow or dog-tail.

ABRAM BOLT.

ANDERSON, S. C., May 18, 1881.—John E. Peoples, Anderson, S. C.—Dean Sie The 60-Saw Hall Gin, Feeder and Condenser, made by Hall S. F. Cotton Gin Co. Sing Sing, N. Y., bought of you last Fall, has given perfect satisfaction to myself and customers. I have used the Emery, Star and Needle Gins, and much prefer the The largest Stock we ever carried. Prices lower than ever before. Hall to either of them. I ginned last season upwards of 400 bales cotton on the Hall Gin, and during the whole season the Gin, Feeder and Condenser did not give me an hour's delay. I can cheerfully recommend it to any one wishing to purchase a Gin. I found no difficulty in ginning yellow cotton, as the Feeder feeds yellow cotton, and takes out all grit and hard substances before it comes in contact with

Anderson, S. C., April 30, 1881.—John E. Peoples, Anderson, S. C.—Dear Sir: The 80-Saw Hall Gin, Feeder and Condenser, made at Sing Sing, N. Y., bought of you last Fall, beats anything of the kind that I have ever used, and I have used several different makes of Cotton Gins. It is the best Gin in use for durability, lightness of draft, cleaning the seed perfectly, and never breaks the roll, and gives entire satisfaction to myself and customers. Laws burst out the 25th of last Sentember, and my customers waited and customers. I was burnt out the 25th of last September, and my customers waited one month on me until-I could get another Hall Gin to gin their cotton. This can be proven by my neighbors. The Feeder and Condenser can't be beat. I have never had any trouble with them.

Yours truly,

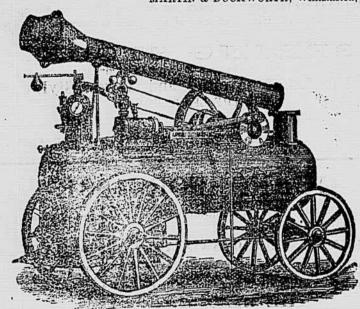

M. A. COBB.

Piercetown, S. C.—Mr. J. E. Peoples, Anderson, S. C.—Dear Sir: The 50-Saw Self-Feeding Hall Cotton Gin, with Condenser attached, made at Sing-Sing, N. Y., purchased of you last Fall has given entire satisfaction. It saves the labor of one hand, and feeds more regularly than could be done by hand, never breaking the roll for a day at a time if attended to. I ginned 350 bales last Fall with it, and it is in as good order appearantly as ever. It makes samples to compete with any other gin. Mr. Sanford Martin had a bale ginned on my gin last Fall that was pronounced by the Piedmont Manufacturing Company to be the best ever brought to that market.

D. H. HAMMOND.

Due West, S. C., July 24, 1880.—Mr. J. E. Peoples.—Dear Sir: In answer to your postal I will say that the Hall Self-Feeding Cotton Gin. made at Sing-Sing, N. Y., that I bought of you has given entire satisfaction. I ginned nine bales a day weighing 450 lbs. Cheans the seed perfectly and makes a superior sample of lint. I want no better for speed, and lightness of draft. Only wish I had taken an 80-saw instead of a 60-saw. Yours truly,

A ADERSON, S. C., May 14, 1881.—Juo. E. Peoples, Anderson, S. C.—The Hall Gin manufact ared at Sing-Sing, N. Y., and purchased of you last season, is the best constructed and fine at finished gin we have ever used. It runs light, never chokes or breaks the roll, and for sample cannot be excelled by any gin ever used in this section. It has given this net shorhood entire satisfaction, and in our opinion is equal to or better than any other gin in use to our knowledge, and would neves and the louy the Hall Gin in preference to any other,
MARTIN & DUCKWORTH, Williamston, S. C. in use to our knowledge, and would advise any one wishing to purchase a good gin

THE SCHOFIELD ENGINE, which has been sold in every section of the Southern States, and which has given such universal satisfaction, will be kept on hand, and sold at prices that will compete with any first-class Engine manufactured. The following testimonials will give an evidence of its superior simplicity, durability and

power:

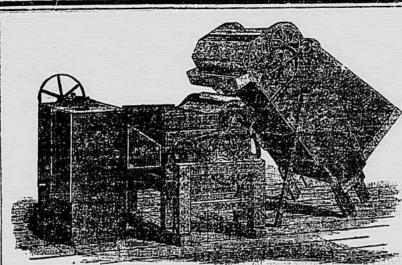

Anderson, S. C., May 6, 1881.—John E. Peoples—Dear Sir; The Schofield Engine purchased of you—six-horse power—has given perfect satisfaction. It is the best Engine I have ever used, and I have used three other different makes. I like it for three reasons. 1st. It is simple and durable. 2nd. It runs smoother and steadier than any Engine in our country. 3rd. It has more power than any Engine made to the number of horse-power. I run a 50-Saw Gin and Feeder with 25 lbs. steam, and can recommend this Engine of the one for former to have gine as the one for farmers to buy.

Piercetown. S. C.—Mr. J. E. Peoples—Dear Sir: The five-horse power Schofield Engine purchased of you last Fall has given satisfaction. My engineer says it is the lightest running Engine he ever had anything to do with. Can keep up more steam with less wood than any other. It runs a 50-Saw Hall Gin, with Feeder and Condenser attached, with all ease, and gin seven bales per day.

Anderson, S. C., April 3, 1881.—To J. E. Peoples: The six-horse Schofield Engine I bought from you last Fall has given entire satisfaction. It is very simple in its machinery, and any ordinary man can run it without any trouble. I am running a 40-inch Circular Saw Mill, and have sawed as high as 3000 feet in one day out of old-field pine logs—logs being very small. It has more power than any 6-horse Engine I ever saw. I cheerfully recommend this Engine to all who desire an Engine. It can't be beat as to smooth running. smooth running.

Samples of the above Machinery can be seen by calling at my Store, and par ties desiring to purchase will find it to their interest to call on or confer with me by

JOHN E. PEOPLES, Agent, Anderson, S. C.

### DANIEL PRATT GIN COMPANY GIN, FEEDER and CONDENSER.

THIS is the 50th year of the Daniel Pratt Cotton Gin Business, during which time they have manufactured over 22,000 Gins, which are used in every cotton-growing State in the Union, in Mexico, South America, British East Indies, and in almost every other country where cotton is grown.

The Revolving Head placed in the end of the cotton-box prevent the Gin from chok-

The Revolving Head placed in the end of the cotton-box prevent the Gin from choking and the roll from breaking. Any common plantation hand being able to feed the Gin satisfactorily. The Feeder is superior to any other machine of the kind in use. They are simple in construction, and easily managed. They stand upon the floor, and are therefore not so hard to get at. The Condenser is equal to any in use—we believe superior to any now made. The lower end of the cylender being open, all dirt from the lint is driven through the floor by the air from the gin-brush. By the use of this Condense, the driven through the floor by the air from the gin-brush. By the use of this Condense, the lint-room can be entirely done away with, saving many dollars in the construction of buildings, making the labor of handling the cotton before packing far easier, and loss and damage by fire is reduced to a minimum. The Feeder and Condenser will pay for themselves in one season. Every machine is fully warranted to do perfect work, and until the purchaser is fully satisfied with the machine we do not ask for payment. Should any machine prove in any way defective, we make the same good at our expense, upon notice being given to us. We give the names of gentlemen in this and adjoining Countes who have the Dariel Pratt Gins, Feeders and Condensers in use, and refer the public to them believing that their recommendation of the machines will be more satisfactory to them, believing that their recommendation of the machines will be more satisfactory to any one desiring to purchase than the ordinary stereotyped form so common:

What the People Say of the William-ston Female College.

A TENNESSEE Teacher writes: "I had A formed an erroneous opinion of the "One-Study" plan; but, with your explanation, my prejudice vanished: and now I do not hesitate to say that, if yours is not the "royal road to learning," it is much bet-ter than the one most generally used. In offering my reasons for liking your plan, I can not do better than refer to those given

in your Catalogue."
The Fall Session will open Aug. 1. For a Catalogue, address REV. S. LANDER,

Williamston, S. C.

#### Cathartic Pills Combine the choicest cathartic principles in medicine, in proportions accurately ad-

justed to secure activity, certainty, and uniformity of effect. They are the result of years of careful study and practical ex-periment, and are the most effectual rem-edy yet discovered for diseases caused by derangement of the stomach, liver, and bowels, which require prompt and effec-tual treatment. AYER'S PILLS are spe-cially applicable to this class of diseases. They act directly on the digestive and They act directly on the directive and assimilative processes, and restore regular healthy action. Their extensive use by physicians in their practice, and by all civilized nations, is one of the many proofs of their value as a safe, sure, and perfectly reliable purgative medicine. Being compounded of the concentrated virtues of purely vegetable substances, they are positively free from calomel or any injurious properties, and can be administered to children with perfect safety.

administered to children with perfect safety.

Ayen's Pills are an effectual cure for Constipation or Costiveness, Indigestion, Dyspepsia, Loss of Appetite, Foul Stomach and Breath, Dizziness, Headache, Loss of Memory, Numbness, Biliousness, Jaundice, Rheumatism, Eruptions and Skin Diseases, Dropsy, Tumors, Worms, Neuralgia, Colic, Gripes, Diarrhœa, Dysentery, Gout, Piles, Disorders of the Liver, and all other diseases resulting from a disordered state of the dizesng from a disordered state of the digestive apparatus. As a Dinner Pill they have no equal.

While gentle in their action, these Pills are the most thorough and search-ing cathartic that can be employed, and never give pain unless the bovels are in-flamed, and then their influence is healdigestive organs; they operate to purify and enrich the blood, and impart renewed health and vigor to the whole

PREPARED BY DR. J. C. AYER & CO., Practical and Analytical Chemists. Lowell, Mass.

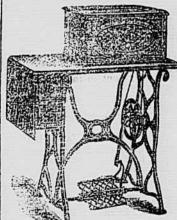

Has removed the agony of rheumatism, and its continued use entirely healed the patient. Rheumatism is but little understood. Some empirica resort to embrecations, which are really dangerous. It is now acknowledged to be a blood disease, resulting from acidity. This aperient corrects all such acidity, and thus cures the disease. All the rheumatic sufferers are advised to try it. SOLD BY ALL DRUGGISTS.
